

WIDEX - Knowledge Transfer for Widened EU Excellence in Advanced Green Technologies, Sustainability and Research Management (Grant Agreement: 101159826)

Call: HORIZON-WIDERA-2023-ACCESS-02

01/06/2024 - 31/05/2027

WIDEX aims to secure sustainable access to essential minerals and elements crucial for Europe's strategic economic sectors by reducing reliance on third countries and promoting green, non-invasive recovery technologies. With Slovakia's Kosice region holding 46% of the country's geological reserves, and the Technical University of Košice (TUKE) recognized as a leading mining university, WIDEX will bridge the EU's research and innovation gap. The 11 consortium partners will focus on enhancing the coordinator TUKE's capabilities in mining exploration, sustainability, and research management while establishing a Central European cluster, a Virtual Centre, and a Stakeholder platform focused on green technologies.

List of participating organisations

Coordinator:

TECHNICAL UNIVERSITY OF KOSICE, Slovakia

Partners

FUNDACION ICAMCYL, Spain

IBERIAN SUSTAINABLE MINING CLUSTER, Spain

MNLT INNOVATIONS IKE, Greece

FRAUNHOFER GESELLSCHAFT ZUR FORDERUNG DER ANGEWANDTEN FORSCHUNG EV,
Germany

IDENER DENER RESEARCH AND DEVELOPMENT AIE, Spain

CONSENTIA, France

LAPLAND UAS, Finland

AVENIR ENERGIE ENVIRONNEMENT AVENIA (POLE AVENIA), France

EIT RAW MATERIALS CLC EAST, Poland

KOSICE REGIONAL GOVERNMENT, Slovakia
